NEW BUSINESS

FY20 Budget update: Mike Fontanella reviewed the status of the town budget indicating that most of the budget gaps have been closed, reporting that the town can support an increase to the School Department of \$1,376,987. In discussions with the superintendent, the school department will defer hiring of the 2 teacher assistants and the supplemental technology support position.

During review of the School Choice account, it is expected that FY19 will end with a balance of \$1,002,476 down from the expected \$1.2M projected during the FY19 budget process. This reduction in School Choice funds is due to an unexpected increase of \$200K in Out of District (OOD) placements. In discussion of FY20 use of School Choice funds, \$250,000 is allocated to offset salaries and \$75K is required to continue the offsets to full day kindergarten, resulting in a projected usage of \$325,000.

It is the policy of the Littleton Public Schools not to discriminate on the basis of race, gender, religion, national origin, color, homelessness, sexual orientation, gender identity, age or disability in its educational programs, services, activities or employment practices. Further information may be obtained by contacting Justine Muir, District Equity Coordinator at 978-540-2500, jmuir@littletonps.org or 33 Shattuck Street, P.O. Box 1486, Littleton, MA 01460.

Our mission is to foster a community of learners who strive for excellence and prepare each student to be a successful, contributing citizen in a global society.

The School Committee discusses the overall budget and was in agreement not to increase usage of the School Choice funds beyond \$320K and look to the fall when the final chapter 70 funds have been allocated to the town. The committee was in agreement that if additional funds was sent to the town, to request those funds be transferred to the School Department to offset the \$90K of unfunded positions. The committee was in further agreement not to over-commit the Choice funds to see how the state budget resolved and if any contingencies in OOD developed over the summer.

In other discussions, Daryl raised the concept that during the FY21 budget planning process the School Committee issue a budget guidance letter to the Superintendent, copies to BOS and FC that the SC is targeting the Choice account at approximately 5% of the appropriated budget. The 5% number is consistent with the level of Excess and Deficiency regional school districts can retain for unexpected expenses.

No actions were taken on the budget, final discussion will occur at the end of the public hearing.

ADJOURNMENT

On a motion by Daryl Baker, and seconded by Jennifer Wilson, it was voted to adjourn at 8:33PM. Roll Call Vote: Matthew Hunt, AYE; Jennifer Wilson, AYE; Erica Podgorni, Daryl Baker, AYE; and Mike Fontanella, AYE.

FY2020 BUDGET PUBLIC HEARING

FY2020 Budget presented by Kelly Clenchy. He highlighted the priorities set forth for 2019-2020 School year. He gave a brief overview of FY2020. Original Budget increase request: Steps and Lanes, Out of District Tuition, Tuition Free Full Day Kindergarten - (Second Year of 5 Year Phase-In Plan), Student Transportation – OOD, Operational Costs.

Additional Services/Staffing requests:

Continued Phase-In Tuition-Free FDK \$75,000

Assistant Principal Russell Street School \$85,000

Mental Health Counselor \$65,000

HR Administrator-Part Time \$35,000

Additional School Resource Officer \$75,000

Funding and explained the proposed budget and funding plans. He gave an overview of the various cost centers within the budget. He presented a School Choice Account slide with different scenarios of how much to be spend out of that account.

Budget concerns are as follow:

Level funding of local aid dollars

Increase in Out of District placements and tuition

New development and housing growth potential impact on classroom space, transportation, SPED

Continuing reliance on Revolving Funds

Contractual and Non-Contractual salaries keeping pace with market trends

Increased costs associated with extra-curricular and co-curricular programming

Town Appropriation support for structural increases

Ability to maintain School Choice seats and associated revenue.

Each School Committee member thanked the budget sub-committee for their time and effort into preparing this year's budget and looking forward to presenting it at the Town meeting in May. Erica Podgorni did emphasize that the Special Ed spending is required and can vary due to unforeseen expenses throughout the school year, which the district is required to pay.

PUBLIC COMMENTS

None

The Vice Chairman closed the Public Hearing on the FY20 Budget.

Moved by Matt Hunt and seconded by Jennifer Wilson to approve the School Budget for FY2020 with a Town Appropriation of \$21,102,192 with the use of School Choice funds of up to \$325,000 as required by purpose or statute. Roll Call Vote: Matthew Hunt, AYE; Jennifer Wilson, AYE; Daryl Baker, AYE; and Erica Podgorni, AYE. Motion carried.

ADJOURNMENT

On a motion by Daryl Baker, and seconded by Matt Hunt, it was voted to adjourn at 8:05PM. Roll Call Vote: Matthew Hunt, AYE; Jennifer Wilson, AYE; Daryl Baker, AYE; and Erica Podgorni, AYE.

Conflict Minerals

- A Mineral mined in an area of armed conflict and traded illicitly to finance the fighting

Why is this so important?

- Conflict minerals are found in everyday items (ie. cell phones)
 - Tin, Tantalum, Tungsten, Cobalt
- Be aware of which companies we purchase from

CONFLICT MINERALS

2017 Company Rankings

CONSUMER ELECTRONICS

JEWELRY RETAIL

Sudan

- February 22, 2019 - Omar al-Bashir declared a state of emergency
 - Many people were shot following the announcement
- U.S. removing sanctions & place on State Sponsors of Terrorism list
- Bipartisan Sudan Bill will stop U.S. from ignoring & condoning Sudanese government's actions
 - Asked Rep. Lori Trahan's office to support

Beneficial Ownership

- “Beneficial Owner” = one who profits from a company/controls its activity
- No law in US mandating companies to disclose the beneficial owners of companies
 - Some use “nominees” to represent a company and conceal the ID of the owner
- Lack of law allows kleptocrats to create shell companies within the US
- Asked senate and house to co-sponsor and support bills consistent:
 - Corporate Transparency Act of 2017
 - True Incorporation Transparency for Law Enforcement (TITLE) Act

Funds For International Investigation

- Currently 2 sanctions investigators for all of Africa
- Asking for additional \$3 million to hire 6 more investigators
- Good for fixing human rights issues at their roots

What We Learned

- It is important to:
 - Reach out to your representatives
 - Spread awareness in your community
 - Always do something, no matter how small
- Everyone can make a difference!

Littleton Public Schools Science, Technology, & Engineering

2018-2019

Gr. 6-12

STE @ Littleton Middle School

- 2018 was the first year that the 8th grade STE MCAS was computer-based.
 - LMS 8th grade STE MCAS results were in the top 5% of the state, with a CPI of 87.4. 11% of students scored Advanced, the highest in four years.
 - At the 2018 MA State Science and Engineering Fair, five LMS student project received awards.
 - Two LMS 8th graders were national science fair semifinalists in the 2018 Broadcom Masters competition.
 - The 8th grade science curriculum was revised to incorporate Marzano standards-based proficiency scales and assessments.
- Thanks to an LEF grant, 6th grade scientists will monitor local water and participate in the worldwide Earth Echo Water Challenge.
 - 8th grade students participated in a pilot of a Concord Consortium genetics learning game called Geniventure.
 - 7th grade students have been using NewsELA to incorporate current events and make connections to their daily lives.
 - This year, an SEL component was introduced to the 7th grade science and engineering fair. Throughout the four-month project, students took time to reflect on competencies and progress in self-awareness, self-management, and relationship skills.

STE @ Littleton High School

- 97% of LHS students who took the 2018 Biology MCAS scored Proficient or Advanced; 98% passing.
- A new lab-based Biotechnology course was developed and is offered this year. Students will learn biotechnology techniques and will even learn CRISPR and will visit Norvatis Pharmaceutical this spring.
- A second, independent, technology-rich physics lab has been set up. This new lab allows students to perform more sophisticated experiments and learn concepts through hands-on experiences.
- Dual enrollment Physics I is offered again; students may elect credit from MCC.
- The climate change unit of CP Environmental Science was updated to incorporate current science, technological advancements, and current events.
- HoloGlobe real-time data Earth Processes modeling software will be integrated into the Earth Science curriculum.
- As a result of the Marzano and SEL initiatives:
 - New cooperative learning opportunities and academic games were added to the CP Chemistry curriculum.
 - More kinesthetic learning experiences have been integrated into the Earth Science curriculum.

High School Visual Art

- ❧ AP Art History running this year
- ❧ Field trip to MFA
- ❧ Student artwork displayed at Reuben Hoar Library as part of their rotating exhibit
- ❧ Ms. Hossfeld attended NAEC which was held in Boston for the first time in 14 years
- ❧ More DSLR Cameras purchased to expand our photography program
- ❧ Spring Art Show – May 7

Middle School Art

- ❧ Scholastic Art & Writing Award Silver Key for 8th Grader Katherine McDonough in Painting
- ❧ Mural Club is painting bathroom stall doors with uplifting messages for students – funded by a grant from PTA
- ❧ Received LEF grant for “Traveling Tokens,”
- ❧ Professional Development on “CLAB”
- ❧ Follow on Twitter: (wintersarted) and IG: (lms_arts)

Elementary Art

RS Highlights

-  New Kiln installed, expansion of 3-5 curriculum as a result
-  Continued focus on team teaching with Heidi MacGregor and utilizing the Think Tank with 4th grade
-  ICA field trip with 5th grade
-  deCordova field trip with 4th grade
-  Art Show – May 2, 6 pm

SL Highlights

-  Continued collaboration with Casey Taylor
-  Second year of Square1Art Fundraiser
-  Purchase of shelving as a result of the fundraiser
-  LEF Grant for R.W. Alley to visit Shaker Lane on April 29

MS/HS Music

- ❧ Welcome Ashley Sheldon, LMS Music
- ❧ Chorus: Performed at Veterans Day Ceremony, COA, annual concerts
- ❧ “Honk” Largest Production to date, featuring more than 60 students, Anne of Green Gables at LHS, Upcoming HS Musical Memorial Day Weekend, LMS Play “Who Pushed Humpty Dumpty,” Performing weekend of May 17
- ❧ Band: Performances at football games, annual concerts, Suites and Sweets, Holiday Bazaar, Town Tree Lighting, Disney World, COA Luncheon, Memorial Day parade, and HS Graduation ceremonies.
- ❧ 6th Annual Mattress Sale on 3/30, \$500 raised at Suites and Sweets in Nov.
- ❧ Music Theory and History of Rock offered this year as new electives at LHS
- ❧ Disney 2019 was a success with 53 students traveling

Elementary Music

- ❧ Curriculum focused on the new National Standards for Music
- ❧ K-2 Students learn American culture through folk songs, dances, games and unpitched percussion
- ❧ Grade 3 expands on K-2 concepts and introduces pitched percussion
- ❧ Grade 3 pairing with Heidi MacGregor to use Think Tank and Scratch to create their own electronic instruments
- ❧ Grade 4 learns soprano recorder, which lets them experience musicianship through instrumental performance and took a trip to the State House for a small concert and tour.
- ❧ Grade 5 expands previous concepts and learns about American History through Jazz and the Blues
- ❧ Donation from Littleton Lumber allows a bucket percussion unit in 5th grade curriculum

October 19, 2018

Dear Superintendents:

DESE is pleased to provide schools and districts with their Views of Climate and Learning (VOCAL) survey results. DESE conducted a survey of students' perceptions of school climate from students in grades 5, 8, and 10 as part of the 2018 MCAS administration.

This data report includes:

- A district-level summary report that provides a snapshot of all your schools' index data (overall school climate score, and engagement, safety, bullying, and environment scores) and comparative district and state data
- Separate reports for each school (by grade) that met our minimum reporting requirements. The school reports include:
 - o Summaries of your students' responses on each individual survey item,
 - o An overall average school climate index score (with comparative district and state data), and
 - o Average index scores for three dimensions of climate: engagement, safety, and environment (with comparative district and state data).

In November, DESE will provide overall school climate data to districts and schools broken out by subgroups (for example, by gender, race/ethnicity).

This year, principals who have reports that meet DESE's minimum reporting requirements will receive their reports in their schools' drop boxes.

All index scores range from 1 to 99 and can be directly compared across dimensions and across grades. A difference of 3 to 4 points or more is meaningful. DESE categorized schools within each grade into three groups based on their overall school climate index score. The range of scores for each grade are:

Grade	Relatively weak (~15% of schools)	Typical (~middle 70%)	Relatively strong (~15% of schools)
Grade 5	1 to 51	52 to 65	66 to 99
Grade 8	1 to 40	41 to 50	51 to 99
Grade 10	1 to 40	41 to 50	51 to 99

If you do not receive any reports, this is either because your schools or district did not meet DESE's minimum reporting requirements or your schools or district did not participate in the 2018 survey administration.

If your school or district did not receive data for a survey item or index, it is because fewer than 10 students participated, and/or all students within the school/district responded with the same answer, and/or the index scores did not meet DESE's minimum requirement for reliability. **Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017.** The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.

We have also embedded three supplemental materials that will help you and your schools understand and interpret what is in the reports. These supplemental materials are:

- An annotated sample report describing the layout and data elements within each report
- School climate profiles for each grade that are based on students' perceptions, to help you interpret the meaning of your overall school climate index score, and
- A two-page summary of school climate survey project and state-level results.

Two other supplemental materials are provided separately in your drop box to support the use of the school climate data. An **interpretive guide and action planning resource** for your district and school reports. These provide information on:

- The types of data within your report and what kinds of analyses you can do with each type
- How to analyze and interpret your data using the annotated sample report data as an example
- An action planning template, and
- Resources available for next steps once you have reviewed your data.

A **searchable crosswalk** highlights the connection between DESE's VOCAL school climate survey items and three other facets of building safe and supportive schools. In the crosswalk, each VOCAL item is mapped on to:

- CASEL's five social and emotional competencies (self-awareness, self-management, social awareness, relationship skills, and responsible decision-making),
- The principles of accessible instruction, and to
- The principles of positive behavior supports

DESE encourages districts and schools to use this student survey data in combination with other available local sources of data from students and parents, staff, and administrators to consider ways to maintain and increase areas of strength and to address any areas of concern. DESE also aims to learn from and help further these local efforts through our strategic priority to support social-emotional learning, health, and safety in schools across the Commonwealth.

If you have any questions about your school climate data, please email Shelagh Peoples (speoples@doe.mass.edu) of the Office of Planning Research.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Carrie', followed by a long, sweeping horizontal stroke that ends in a small loop.

Carrie Conaway
Chief Strategy and Research Officer

Grade 5 VOCAL Profile: Statewide, scores range from 33 to 78

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)

Teachers help students succeed academically by using different strategies to explain and make content accessible. Teachers use student ideas, interests, and sharing to help students learn. The classroom environment is very collaborative and supportive among students, and between students and teachers. Most students view their school work as appropriately challenging and enjoy learning more when home.</p> <p>3. Students feel very safe in school. Some bullying behaviors are present but teachers/adults actively counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. A large majority of students feel school rules are fair for all students. Students have a say in deciding these rules.</p> <p>4. Students, overall, feel very happy in school and have a strong sense of belonging to their school. Schools actively teach students how to develop caring relationships and how to manage their emotions when angry or upset. Similarly, teachers actively reach out to help distressed students. As a result, students feel comfortable seeking help. Students can also largely rely on their peers for emotional support.</p>
The average student within these schools responds “mostly true” to a large majority of items, and “always true” and “mostly untrue” to three and two items, respectively	The average student within these schools responds “mostly true” to a majority of items, “always true” to all but one of the remaining items, and “mostly untrue” to one item	The average student within these schools responds “always true” to a majority of items, and “mostly true” to all remaining items.

• Descriptors bolded highlight the salient differences between the perceptions of the average student within the three categories of schools (weak, typical, and strong).

Grade 8 VOCAL Profile: Statewide, scores range from 32 to 70

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
1  40	41  50	51  99
<p>1. Student-on-student relationships lack respect with students less open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students, and with students' families.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers encourage students to work hard and try to instill a belief that all students can do well. Teachers tend not to use student ideas, cultural backgrounds, and interests to plan and guide their instruction, or to provide students with a choice in how to show their learning. Most students view their school work as appropriately challenging. The classroom environment is predominantly collaborative and supportive among students and between students and teachers.</p> <p>3. Students feel fairly safe in school. Bullying behaviors are more prevalent. Teachers/adults try to counteract these behaviors. Students will largely not intervene to prevent bullying. When students are in trouble, students generally are not provided with a chance to explain their behavior. To reduce behavioral problems, students are taught how to settle conflicts by themselves. Staff are generally consistent when enforcing rules but students have no say in deciding these rules.</p> <p>4. Students feel stressed about their grades. Most students have access to relatively effective social and emotional support systems. Despite believing their teachers are interested in their emotional well-being and teachers try to reach out to help distressed students, students feel relatively uncomfortable approaching teachers and counselors for help. Students are less able to rely on their peers for support when they are upset.</p>	<p>1. Student-on-student relationships are largely respectful with students open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students, and with students' families.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers actively encourage students to work hard and instill a belief that all students can do well. Teachers use student ideas, cultural backgrounds, and interests to plan and guide their instruction and do allow students to choose how they want to show their learning. Most students view their school work as appropriately challenging. The classroom environment is predominantly collaborative and supportive among students and between students and teachers.</p> <p>3. Students feel safe in school. Bullying behaviors are present but teachers/adults try to counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. To reduce behavioral problems, students are taught how to settle conflicts by themselves. Staff are generally consistent when enforcing rules but students have limited say in deciding these rules.</p> <p>4. Students feel stressed about their grades. Most students have access to relatively effective social and emotional support systems. Because most students believe their teachers are interested in their emotional well-being and teachers try to reach out to help distressed students, students feel relatively comfortable approaching teachers and counselors for help. Most students can also rely on their peers for emotional support when they are upset.</p>	<p>1. Student-on-student relationships are largely respectful with students open to having inclusive relationships with a diverse range of students. Adults actively promote and model respectful interactions among and between students, and with students' families.</p> <p>2. Teachers set high expectations and are readily available when students need help. Teachers actively encourage students to work hard and instill a belief that all students can do well. Teachers use student ideas, cultural backgrounds, and interests to plan and guide their instruction and do allow students to choose how they want to show their learning. Most students view their school work as appropriately challenging. The classroom environment is predominantly collaborative and supportive among students and between students and teachers.</p> <p>3. When students are in trouble, most students are given a chance to explain their behavior. To reduce behavioral problems, students are taught how to settle conflicts by themselves. Staff are generally consistent when enforcing rules but students have limited say in deciding these rules.</p> <p>4. Students feel some stress about their grades. Most students have access to relatively effective social and emotional support systems. Because most students believe their teachers are interested in their emotional well-being and teachers try to reach out to help distressed students, students feel relatively comfortable approaching teachers and counselors for help. Most students can also rely on their peers for emotional support when they are upset.</p>
The average student within these schools responds “mostly true” to a majority of items, “mostly untrue” to all but one of the remaining items, and “never true” to one item.	The average student within these schools responds “mostly true” to a large majority of items and “always true” and “mostly untrue” to four and two items, respectively	The average student within these schools responds “mostly true” to a majority of items, “always true” to all but one of the remaining items, and “mostly untrue” to one item.

• Descriptors bolded highlight the salient differences between the perceptions of the average student within the three categories of schools (weak, typical, and strong).

Grade 10 VOCAL Profile: Statewide, scores range from 27 to 67

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
1  40	41  50	51  99
<p>1. Student-on-student relationships lack respect with students less open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers tend not to use student feedback, ideas, or interests to guide their instruction. Students view their learning as relatively irrelevant. Encouragement and opportunities for students to challenge themselves to learn are largely limited. The classroom environment is predominantly collaborative and supportive among students and between students and teachers. Teachers generally inspire confidence in students' ability to succeed after high school.</p> <p>3. Students feel fairly safe in school. Bullying behaviors are more prevalent. Teachers/adults try to counteract these behaviors. Students will largely not intervene to prevent bullying. When students are in trouble, most students are not provided with a chance to explain their behavior. Any disciplinary consequences are generally consistent across all students. Students have no say in deciding school rules.</p> <p>4. Students feel stressed about their grades and most consider the level of academic pressure somewhat unhealthy. Students are less able to rely on their friends to help them cope with any emotional problems, or supportive friendships are missing. Most students report having access to relatively effective social and emotional support systems. Teachers, for the most part, reach out to help students emotionally. Students have a more moderate sense of belonging to their school.</p>	<p>1. Student-on-student relationships are largely respectful with students open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers use student feedback, ideas, and interests to guide their instruction. Students view their learning as mostly relevant. Encouragement and opportunities for students to challenge themselves to learn are largely available. The classroom environment is predominantly collaborative and supportive among students and between students and teachers. Teachers generally inspire confidence in students' ability to succeed after high school.</p> <p>3. Students feel safe in school. Some bullying behaviors do occur but teachers/adults try to counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. Any disciplinary consequences are generally consistent across all students. Students have limited say in deciding school rules.</p> <p>4. Students feel stressed about their grades but most do not consider the level of academic pressure unhealthy. They rely heavily on their friends to help them cope with any emotional problems. Most students report having access to relatively effective social and emotional support systems. Teachers, for the most part, reach out to help students emotionally. Students have a strong sense of belonging to their school.</p>	<p>1. Dimensions and topics measured by VOCAL

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Views of Climate and Learning (VOCAL) Survey, 2018

DISTRICT REPORT

Littleton Public School District Grade 10

Suppression note: "--" means data are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Views of Climate and Learning (VOCAL) Survey
North Public School District

DESE categorized schools into three groups based on their overall school climate index score. All index scores range from 1 to 99. The range of points for each score category is provided.

Legend:

	Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
Grade 5	1 —————→ 51	52 —————→ 65	66 —————→ 99
Grade 8 and 10	1 —————→ 40	41 —————→ 50	51 —————→ 99

This part of the report provides state-level school climate data (orange text) broken out for each grade and dimension. State index scores are also shown by the orange circle.

Suppression note: Blank or "--" means data are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Overall summary by grade

Number of students contributing to the index score.

	School Climate			Engagement			Safety			Environment		
	N	Index Score	State	N	Index Score	State	N	Index Score	State	N	Index Score	State

	3,000	47	45	3,000	49	46	3,000	45	45	3,000	50	46
	*Bullying											
	6,000	48	50									

ng climate

State's and district's average bullying topic index score. Bullying topic scores can be compared to all other index scores.

*Higher bullying index score indicates safer bullying climate.

This section of the report shows the overall school climate index score and the three dimension index scores for a district (all grades) and for each grade. District index scores are also shown by the blue bar. Engagement, safety, and environment are three distinct but related dimensions of school climate. **All scores range from 1 to 99 and can be directly compared across dimensions and across grades.** A difference of 3 to 4 points or more is meaningful.

Dimensions and topics measured by VOCAL

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

This section provides a description of what the VOCAL survey is measuring for each topic and dimension.

If a school is missing from this list, the school was likely not opened by the time of the survey administration or did not participate in the survey.

If data is missing, the school either did not meet the minimum N of 10 or a minimum reliability requirement for index scores of 0.7.

Blue bar represents average school climate, engagement, safety, and environment index score for school. Orange circle represents the state average score.

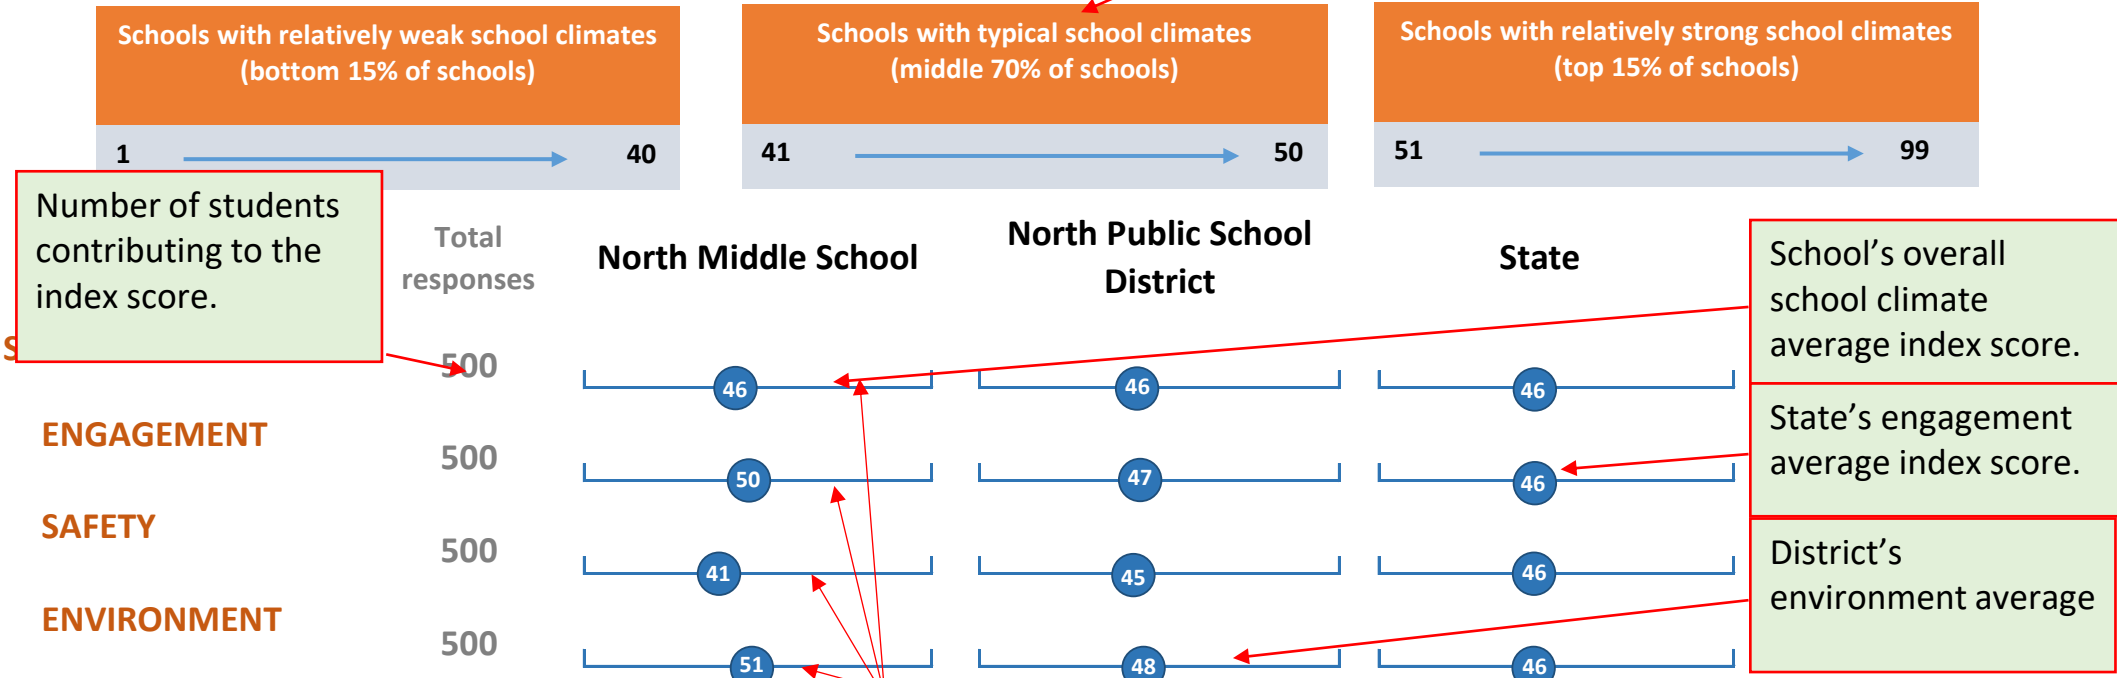

North Public School District: North Middle School
Grade 8

Suppression note: Blank or "--" means data are suppressed if fewer than 10 students responded or the reliability is from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across time.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

DESE categorized schools into three groups based on their overall school climate index score. All index scores range from 1 to 99. The range of points for each score category is provided.

Average Index Score by Dimension

This section of the report allows you to directly compare your school's average index scores (overall school climate, engagement, safety, and environment) to your district's and to the state's average scores. A difference of 3 to 4 points or more is meaningful.

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Background

- The Views of Climate and Learning (VOCAL) survey is designed to provide schools with information on student perceptions of three dimensions of school climate: engagement, safety, and environment. The topics measured within each dimension are summarized below.

Engagement	Safety	Environment
<ul style="list-style-type: none"> The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes. 	<ul style="list-style-type: none"> The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students 	<ul style="list-style-type: none"> The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
<ul style="list-style-type: none"> The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers. 	<ul style="list-style-type: none"> The extent that students feel physically safe within the school environment. 	<ul style="list-style-type: none"> The extent that students have access to systems support that effectively support their social, emotional and mental health well-being
<ul style="list-style-type: none"> The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life. 	<ul style="list-style-type: none"> The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying. 	<ul style="list-style-type: none"> The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

- The survey is based on the conceptual framework of the U.S. Department of Education's School Climate Surveys.
- The VOCAL survey helps the state to meet requirements included in the Act Relative to Bullying in Schools.

Survey design, responses, scales, and reporting

- Students in grades 5, 8, and 10 were given the option to participate in the survey as part of the state MCAS administration in 2018. The survey was optional for districts, schools, and individual students.
- DESE administered 76 items across the three grades with common items across the surveys to allow for later data linking. All items used the same response options: always true, mostly true, mostly untrue, and never true.
- Statewide, 79 percent of eligible students participated in the survey: 84% in grade 5, 89% in grade 8, and 64% in grade 10. Large majorities of schools (94%) and districts (97%) had at least one student respond. Responding students were demographically similar to non-responding students.
- In addition to reporting individual item responses, DESE developed an overall school climate index score and index scores for the three dimensions of climate (engagement, safety, and environment). These indices were set to a mean of 50 and a standard deviation of 20; differences on the indices of about 3 to 4 points or more represent a meaningful difference in school climate.
- All indices in 2018 are directly comparable to one another and across grade levels. For the first time, districts will also receive a bullying index score that can be compared to other scores. Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017. The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.
- To preserve respondent confidentiality, DESE suppressed data if fewer than 10 students responded, if all students responded identically on an item, or if the reliability of the responses was at least 0.7 on a scale from 0 to 1. After accounting for these criteria, 88% of schools and 94% of districts received a report.

Findings

- Students generally reported that they experienced positive school climates.
 - In schools with typical school climates, the average student within the school responded "mostly true" to a majority of items and "always true" to a majority of the remaining items
 - Across all three grades, 7 in 10 students responded in the two most positive categories on over 60% of the items within each survey.

VOCAL 2018 Summary

October 2018

- Students in grade 5 reported more positive school climates than students in grade 8 or grade 10 across all three dimensions of school climate.

	Student-level average index score		
	Grade 5	Grade 8	Grade 10
Overall school climate	58	46	45
Engagement	56	46	46
Safety	58	46	45
Bullying	57	46	45
Environment	56	46	46

o In schools with typical school climates, the average fifth grade student responded “always true” to a 33% of the survey’s items. In comparison, the average grade 8 and grade 10 student within schools with typical school climates responded “always true” to only 16% and 10% of the surveys’ items, respectively. For example, 22% of grade 5 students responded “always true” to the statement, “My teachers use my ideas to help my classmates learn.” In comparison, 8% and 12% of grade 8 and grade 10 students responded similarly to this item.

- Among schools that had sufficient responses to receive reports, the overall school climate index ranged from 27 to 78, showing considerable variation in climate across schools. Substantial variation was also evident among schools for each of the three dimensions of school climate: engagement (scores ranged from 35 to 75), safety (23 to 74), and environment (30 to 73).
- Across the three grades, students in schools with the strongest climates (the top 15% percent of schools) reported many more positive aspects of their school environments when compared to students in the weakest climates (the bottom 15% of schools).

o In grade 5, students in the strongest schools are more open to having inclusive relationships with a diverse range of students and the classroom environment is more collaborative. Teachers have higher expectations for student effort, perseverance, and academics. Students feel safer in the strongest schools with fewer bullying occurrences. They believe their school rules are fair for all students, not just some. Adults are also more active in helping students emotionally and teaching positive behavior.

o In grade 8, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student effort and academics, and use student ideas and interests to plan and guide instruction. Teachers are more readily available when students need help. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

o In grade 10, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student academics and provide more opportunities for students to challenge themselves. They are more readily available when students need help. Teachers use student ideas, feedback and interests to guide instruction. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

North Public School District: North Middle School
Grade 8

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Massachusetts Department of Elementary and Secondary Education

75 Pleasant Street, Malden, Massachusetts 02148-4906

Telephone: (781) 338-3000

TTY: N.E.T. Relay 1-800-439-2370

October 19, 2018

Dear Principals:

DESE is pleased to provide schools with a report of their Views of Climate and Learning (VOCAL) survey results. DESE conducted a survey of students' perceptions of school climate from students in grades 5, 8, and 10 as part of the 2018 MCAS administration.

This data report includes:

- Summaries of your students' responses on each individual survey item
- An overall average school climate index score (with comparative district and state data), and
- Average index scores for three dimensions of climate: engagement, safety, and environment (with comparative district and state data).

In November, DESE will provide overall school climate data to districts and schools broken out by subgroups (for example, by gender, race/ethnicity).

All index scores range from 1 to 99 and can be directly compared across dimensions and across grades. A difference of 3 to 4 points or more is meaningful. DESE categorized schools within each grade into three groups based on their overall school climate index score. The range of scores for each grade are:

Grade	Relatively weak (~15% of schools)	Typical (~middle 70%)	Relatively strong (~15% of schools)
Grade 5	1 to 51	52 to 65	66 to 99
Grade 8	1 to 40	41 to 50	51 to 99
Grade 10	1 to 40	41 to 50	51 to 99

If you do not receive any reports, this is either because your school did not meet DESE's minimum reporting requirements or your school did not participate in the 2018 survey administration.

If your school or district did not receive data for a survey item or index, it is because fewer than 10 students participated, and/or all students within the school/district responded with the same answer, and/or the index scores did not meet DESE's minimum requirement for reliability. **Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017.** The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.

We have also embedded three supplemental materials that will help you and your schools understand and interpret what is in the reports. These supplemental materials are:

- An annotated sample report describing the layout and data elements within each report
- School climate profiles for each grade that are based on students' perceptions, to help you interpret the meaning of your overall school climate index score, and

- A two-page summary of school climate survey project and state-level results.

Two other supplemental materials are provided separately in your drop box to support the use of the school climate data. An **interpretive guide and action planning resource** for your district and school reports. These provide information on:

- The types of data within your report and what kinds of analyses you can do with each type
- How to analyze and interpret your data using the annotated sample report data as an example
- An action planning template, and
- Resources available for next steps once you have reviewed your data.

A **searchable crosswalk** highlights the connection between DESE's VOCAL school climate survey items and three other facets of building safe and supportive schools. In the crosswalk, each VOCAL item is mapped on to:

- CASEL's five social and emotional competencies (self-awareness, self-management, social awareness, relationship skills, and responsible decision-making),
- The principles of accessible instruction, and to
- The principles of positive behavior supports

DESE encourages schools to work together and use this student survey data in combination with other available local sources of data from students and parents, staff, and administrators to consider ways to maintain and increase areas of strength and to address any areas of concern. DESE also aims to learn from and help further these local efforts through our strategic priority to support social-emotional learning, health, and safety in schools across the Commonwealth.

If you have any questions about your school climate data, please email Shelagh Peoples (speoples@doe.mass.edu) of the Office of Planning Research.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Carrie', followed by a long, sweeping horizontal stroke that ends in a small upward flick.

Carrie Conaway
Chief Strategy and Research Officer

Grade 10 VOCAL Profile: Statewide, scores range from 27 to 67

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
1  40	41  50	51  99
<p>1. Student-on-student relationships lack respect with students less open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers tend not to use student feedback, ideas, or interests to guide their instruction. Students view their learning as relatively irrelevant. Encouragement and opportunities for students to challenge themselves to learn are largely limited. The classroom environment is predominantly collaborative and supportive among students and between students and teachers. Teachers generally inspire confidence in students' ability to succeed after high school.</p> <p>3. Students feel fairly safe in school. Bullying behaviors are more prevalent. Teachers/adults try to counteract these behaviors. Students will largely not intervene to prevent bullying. When students are in trouble, most students are not provided with a chance to explain their behavior. Any disciplinary consequences are generally consistent across all students. Students have no say in deciding school rules.</p> <p>4. Students feel stressed about their grades and most consider the level of academic pressure somewhat unhealthy. Students are less able to rely on their friends to help them cope with any emotional problems, or supportive friendships are missing. Most students report having access to relatively effective social and emotional support systems. Teachers, for the most part, reach out to help students emotionally. Students have a more moderate sense of belonging to their school.</p>	<p>1. The average student within these schools responds “mostly true” to a majority of items, “mostly untrue” to all but one of the remaining items, and “never true” to one item.	The average student within these schools responds “mostly true” to a large majority of items and “always true” and “mostly untrue” to four and two items, respectively	The average student within these schools responds “mostly true” to a majority of items, “always true” to all but one of the remaining items, and “mostly untrue” to one item.

• Descriptors bolded highlight the salient differences between the perceptions of the average student within the three categories of schools (weak, typical, and strong).

Littleton Public School District: Littleton High School
Grade 10

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Suppression note: Blank or "--" means data are suppressed if fewer than 10 students responded or the reliability is from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across time.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

DESE categorized schools into three groups based on their overall school climate index score. All index scores range from 1 to 99. The range of points for each score category is provided.

Average Index Score by Dimension

This section of the report allows you to directly compare your school's average index scores (overall school climate, engagement, safety, and environment) to your district's and to the state's average scores. A difference of 3 to 4 points or more is meaningful.

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

This section provides a description of what the VOCAL survey is measuring for each topic and dimension.

Background

- The Views of Climate and Learning (VOCAL) survey is designed to provide schools with information on student perceptions of three dimensions of school climate: engagement, safety, and environment. The topics measured within each dimension are summarized below.

Engagement	Safety	Environment
<ul style="list-style-type: none"> The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes. 	<ul style="list-style-type: none"> The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students 	<ul style="list-style-type: none"> The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
<ul style="list-style-type: none"> The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers. 	<ul style="list-style-type: none"> The extent that students feel physically safe within the school environment. 	<ul style="list-style-type: none"> The extent that students have access to systems support that effectively support their social, emotional and mental health well-being
<ul style="list-style-type: none"> The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life. 	<ul style="list-style-type: none"> The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying. 	<ul style="list-style-type: none"> The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

- The survey is based on the conceptual framework of the U.S. Department of Education's School Climate Surveys.
- The VOCAL survey helps the state to meet requirements included in the Act Relative to Bullying in Schools.

Survey design, responses, scales, and reporting

- Students in grades 5, 8, and 10 were given the option to participate in the survey as part of the state MCAS administration in 2018. The survey was optional for districts, schools, and individual students.
- DESE administered 76 items across the three grades with common items across the surveys to allow for later data linking. All items used the same response options: always true, mostly true, mostly untrue, and never true.
- Statewide, 79 percent of eligible students participated in the survey: 84% in grade 5, 89% in grade 8, and 64% in grade 10. Large majorities of schools (94%) and districts (97%) had at least one student respond. Responding students were demographically similar to non-responding students.
- In addition to reporting individual item responses, DESE developed an overall school climate index score and index scores for the three dimensions of climate (engagement, safety, and environment). These indices were set to a mean of 50 and a standard deviation of 20; differences on the indices of about 3 to 4 points or more represent a meaningful difference in school climate.
- All indices in 2018 are directly comparable to one another and across grade levels. For the first time, districts will also receive a bullying index score that can be compared to other scores. Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017. The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.
- To preserve respondent confidentiality, DESE suppressed data if fewer than 10 students responded, if all students responded identically on an item, or if the reliability of the responses was at least 0.7 on a scale from 0 to 1. After accounting for these criteria, 88% of schools and 94% of districts received a report.

Findings

- Students generally reported that they experienced positive school climates.
 - In schools with typical school climates, the average student within the school responded "mostly true" to a majority of items and "always true" to a majority of the remaining items
 - Across all three grades, 7 in 10 students responded in the two most positive categories on over 60% of the items within each survey.

VOCAL 2018 Summary

October 2018

- Students in grade 5 reported more positive school climates than students in grade 8 or grade 10 across all three dimensions of school climate.

	Student-level average index score		
	Grade 5	Grade 8	Grade 10
Overall school climate	58	46	45
Engagement	56	46	46
Safety	58	46	45
Bullying	57	46	45
Environment	56	46	46

o In schools with typical school climates, the average fifth grade student responded “always true” to a 33% of the survey’s items. In comparison, the average grade 8 and grade 10 student within schools with typical school climates responded “always true” to only 16% and 10% of the surveys’ items, respectively. For example, 22% of grade 5 students responded “always true” to the statement, “My teachers use my ideas to help my classmates learn.” In comparison, 8% and 12% of grade 8 and grade 10 students responded similarly to this item.

- Among schools that had sufficient responses to receive reports, the overall school climate index ranged from 27 to 78, showing considerable variation in climate across schools. Substantial variation was also evident among schools for each of the three dimensions of school climate: engagement (scores ranged from 35 to 75), safety (23 to 74), and environment (30 to 73).
- Across the three grades, students in schools with the strongest climates (the top 15% percent of schools) reported many more positive aspects of their school environments when compared to students in the weakest climates (the bottom 15% of schools).

o In grade 5, students in the strongest schools are more open to having inclusive relationships with a diverse range of students and the classroom environment is more collaborative. Teachers have higher expectations for student effort, perseverance, and academics. Students feel safer in the strongest schools with fewer bullying occurrences. They believe their school rules are fair for all students, not just some. Adults are also more active in helping students emotionally and teaching positive behavior.

o In grade 8, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student effort and academics, and use student ideas and interests to plan and guide instruction. Teachers are more readily available when students need help. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

o In grade 10, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student academics and provide more opportunities for students to challenge themselves. They are more readily available when students need help. Teachers use student ideas, feedback and interests to guide instruction. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

North Public School District: North Middle School
Grade 8

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

TTY: N.E.T. Relay 1-800-439-2370

October 19, 2018

Dear Principals:

DESE is pleased to provide schools with a report of their Views of Climate and Learning (VOCAL) survey results. DESE conducted a survey of students' perceptions of school climate from students in grades 5, 8, and 10 as part of the 2018 MCAS administration.

This data report includes:

- Summaries of your students' responses on each individual survey item
- An overall average school climate index score (with comparative district and state data), and
- Average index scores for three dimensions of climate: engagement, safety, and environment (with comparative district and state data).

In November, DESE will provide overall school climate data to districts and schools broken out by subgroups (for example, by gender, race/ethnicity).

All index scores range from 1 to 99 and can be directly compared across dimensions and across grades. A difference of 3 to 4 points or more is meaningful. DESE categorized schools within each grade into three groups based on their overall school climate index score. The range of scores for each grade are:

Grade	Relatively weak (~15% of schools)	Typical (~middle 70%)	Relatively strong (~15% of schools)
Grade 5	1 to 51	52 to 65	66 to 99
Grade 8	1 to 40	41 to 50	51 to 99
Grade 10	1 to 40	41 to 50	51 to 99

If you do not receive any reports, this is either because your school did not meet DESE's minimum reporting requirements or your school did not participate in the 2018 survey administration.

If your school or district did not receive data for a survey item or index, it is because fewer than 10 students participated, and/or all students within the school/district responded with the same answer, and/or the index scores did not meet DESE's minimum requirement for reliability. **Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017.** The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.

We have also embedded three supplemental materials that will help you and your schools understand and interpret what is in the reports. These supplemental materials are:

- An annotated sample report describing the layout and data elements within each report
- School climate profiles for each grade that are based on students' perceptions, to help you interpret the meaning of your overall school climate index score, and

- A two-page summary of school climate survey project and state-level results.

Two other supplemental materials are provided separately in your drop box to support the use of the school climate data. An **interpretive guide and action planning resource** for your district and school reports. These provide information on:

- The types of data within your report and what kinds of analyses you can do with each type
- How to analyze and interpret your data using the annotated sample report data as an example
- An action planning template, and
- Resources available for next steps once you have reviewed your data.

A **searchable crosswalk** highlights the connection between DESE's VOCAL school climate survey items and three other facets of building safe and supportive schools. In the crosswalk, each VOCAL item is mapped on to:

- CASEL's five social and emotional competencies (self-awareness, self-management, social awareness, relationship skills, and responsible decision-making),
- The principles of accessible instruction, and to
- The principles of positive behavior supports

DESE encourages schools to work together and use this student survey data in combination with other available local sources of data from students and parents, staff, and administrators to consider ways to maintain and increase areas of strength and to address any areas of concern. DESE also aims to learn from and help further these local efforts through our strategic priority to support social-emotional learning, health, and safety in schools across the Commonwealth.

If you have any questions about your school climate data, please email Shelagh Peoples (speoples@doe.mass.edu) of the Office of Planning Research.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Carrie', followed by a long, sweeping horizontal stroke that ends in a small upward flick.

Grade 8 VOCAL Profile: Statewide, scores range from 32 to 70

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
1  40	41  50	51  99
<p>1. Student-on-student relationships lack respect with students less open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students, and with students' families.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers encourage students to work hard and try to instill a belief that all students can do well. Teachers tend not to use student ideas, cultural backgrounds, and interests to plan and guide their instruction, or to provide students with a choice in how to show their learning. Most students view their school work as appropriately challenging. The classroom environment is predominantly collaborative and supportive among students and between students and teachers.</p> <p>3. Students feel fairly safe in school. Bullying behaviors are more prevalent. Teachers/adults try to counteract these behaviors. Students will largely not intervene to prevent bullying. When students are in trouble, students generally are not provided with a chance to explain their behavior. To reduce behavioral problems, students are taught how to settle conflicts by themselves. Staff are generally consistent when enforcing rules but students have no say in deciding these rules.</p> <p>4. Students feel stressed about their grades. Most students have access to relatively effective social and emotional support systems. Despite believing their teachers are interested in their emotional well-being and teachers try to reach out to help distressed students, students feel relatively uncomfortable approaching teachers and counselors for help. Students are less able to rely on their peers for support when they are upset.</p>	<p>1. Student-on-student relationships are largely respectful with students open to having inclusive relationships with a diverse range of students. Adults generally promote and model respectful interactions among and between students, and with students' families.</p> <p>2. Teachers set moderately high expectations and are available when students need help. Teachers actively encourage students to work hard and instill a belief that all students can do well. Teachers use student ideas, cultural backgrounds, and interests to plan and guide their instruction and do allow students to choose how they want to show their learning. Most students view their school work as appropriately challenging. The classroom environment is predominantly collaborative and supportive among students and between students and teachers.</p> <p>3. Students feel safe in school. Bullying behaviors are present but teachers/adults try to counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. To reduce behavioral problems, students are taught how to settle conflicts by themselves. Staff are generally consistent when enforcing rules but students have limited say in deciding these rules.</p> <p>4. Students feel stressed about their grades. Most students have access to relatively effective social and emotional support systems. Because most students believe their teachers are interested in their emotional well-being and teachers try to reach out to help distressed students, students feel relatively comfortable approaching teachers and counselors for help. Most students can also rely on their peers for emotional support when they are upset.</p>	<p>1. The average student within these schools responds “mostly true” to a majority of items, “mostly untrue” to all but one of the remaining items, and “never true” to one item.	The average student within these schools responds “mostly true” to a large majority of items and “always true” and “mostly untrue” to four and two items, respectively	The average student within these schools responds “mostly true” to a majority of items, “always true” to all but one of the remaining items, and “mostly untrue” to one item.

• Descriptors bolded highlight the salient differences between the perceptions of the average student within the three categories of schools (weak, typical, and strong).

Littleton Public School District: Littleton Middle School
Grade 8

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

DESE categorized schools into three groups based on their overall school climate index score. All index scores range from 1 to 99. The range of points for each score category is provided.

Average Index Score by Dimension

This section of the report allows you to directly compare your school's average index scores (overall school climate, engagement, safety, and environment) to your district's and to the state's average scores. A difference of 3 to 4 points or more is meaningful.

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

This section provides a description of what the VOCAL survey is measuring for each topic and dimension.

Background

- The Views of Climate and Learning (VOCAL) survey is designed to provide schools with information on student perceptions of three dimensions of school climate: engagement, safety, and environment. The topics measured within each dimension are summarized below.

Engagement	Safety	Environment
<ul style="list-style-type: none"> The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes. 	<ul style="list-style-type: none"> The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students 	<ul style="list-style-type: none"> The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
<ul style="list-style-type: none"> The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers. 	<ul style="list-style-type: none"> The extent that students feel physically safe within the school environment. 	<ul style="list-style-type: none"> The extent that students have access to systems support that effectively support their social, emotional and mental health well-being
<ul style="list-style-type: none"> The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life. 	<ul style="list-style-type: none"> The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying. 	<ul style="list-style-type: none"> The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

- The survey is based on the conceptual framework of the U.S. Department of Education's School Climate Surveys.
- The VOCAL survey helps the state to meet requirements included in the Act Relative to Bullying in Schools.

Survey design, responses, scales, and reporting

- Students in grades 5, 8, and 10 were given the option to participate in the survey as part of the state MCAS administration in 2018. The survey was optional for districts, schools, and individual students.
- DESE administered 76 items across the three grades with common items across the surveys to allow for later data linking. All items used the same response options: always true, mostly true, mostly untrue, and never true.
- Statewide, 79 percent of eligible students participated in the survey: 84% in grade 5, 89% in grade 8, and 64% in grade 10. Large majorities of schools (94%) and districts (97%) had at least one student respond. Responding students were demographically similar to non-responding students.
- In addition to reporting individual item responses, DESE developed an overall school climate index score and index scores for the three dimensions of climate (engagement, safety, and environment). These indices were set to a mean of 50 and a standard deviation of 20; differences on the indices of about 3 to 4 points or more represent a meaningful difference in school climate.
- All indices in 2018 are directly comparable to one another and across grade levels. For the first time, districts will also receive a bullying index score that can be compared to other scores. Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017. The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.
- To preserve respondent confidentiality, DESE suppressed data if fewer than 10 students responded, if all students responded identically on an item, or if the reliability of the responses was at least 0.7 on a scale from 0 to 1. After accounting for these criteria, 88% of schools and 94% of districts received a report.

Findings

- Students generally reported that they experienced positive school climates.
 - In schools with typical school climates, the average student within the school responded "mostly true" to a majority of items and "always true" to a majority of the remaining items
 - Across all three grades, 7 in 10 students responded in the two most positive categories on over 60% of the items within each survey.

VOCAL 2018 Summary

October 2018

- Students in grade 5 reported more positive school climates than students in grade 8 or grade 10 across all three dimensions of school climate.

	Student-level average index score		
	Grade 5	Grade 8	Grade 10
Overall school climate	58	46	45
Engagement	56	46	46
Safety	58	46	45
Bullying	57	46	45
Environment	56	46	46

o In schools with typical school climates, the average fifth grade student responded “always true” to a 33% of the survey’s items. In comparison, the average grade 8 and grade 10 student within schools with typical school climates responded “always true” to only 16% and 10% of the surveys’ items, respectively. For example, 22% of grade 5 students responded “always true” to the statement, “My teachers use my ideas to help my classmates learn.” In comparison, 8% and 12% of grade 8 and grade 10 students responded similarly to this item.

- Among schools that had sufficient responses to receive reports, the overall school climate index ranged from 27 to 78, showing considerable variation in climate across schools. Substantial variation was also evident among schools for each of the three dimensions of school climate: engagement (scores ranged from 35 to 75), safety (23 to 74), and environment (30 to 73).
- Across the three grades, students in schools with the strongest climates (the top 15% percent of schools) reported many more positive aspects of their school environments when compared to students in the weakest climates (the bottom 15% of schools).

o In grade 5, students in the strongest schools are more open to having inclusive relationships with a diverse range of students and the classroom environment is more collaborative. Teachers have higher expectations for student effort, perseverance, and academics. Students feel safer in the strongest schools with fewer bullying occurrences. They believe their school rules are fair for all students, not just some. Adults are also more active in helping students emotionally and teaching positive behavior.

o In grade 8, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student effort and academics, and use student ideas and interests to plan and guide instruction. Teachers are more readily available when students need help. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

o In grade 10, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student academics and provide more opportunities for students to challenge themselves. They are more readily available when students need help. Teachers use student ideas, feedback and interests to guide instruction. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

North Public School District: North Middle School
Grade 8

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

TTY: N.E.T. Relay 1-800-439-2370

October 19, 2018

Dear Principals:

DESE is pleased to provide schools with a report of their Views of Climate and Learning (VOCAL) survey results. DESE conducted a survey of students' perceptions of school climate from students in grades 5, 8, and 10 as part of the 2018 MCAS administration.

This data report includes:

- Summaries of your students' responses on each individual survey item
- An overall average school climate index score (with comparative district and state data), and
- Average index scores for three dimensions of climate: engagement, safety, and environment (with comparative district and state data).

In November, DESE will provide overall school climate data to districts and schools broken out by subgroups (for example, by gender, race/ethnicity).

All index scores range from 1 to 99 and can be directly compared across dimensions and across grades. A difference of 3 to 4 points or more is meaningful. DESE categorized schools within each grade into three groups based on their overall school climate index score. The range of scores for each grade are:

Grade	Relatively weak (~15% of schools)	Typical (~middle 70%)	Relatively strong (~15% of schools)
Grade 5	1 to 51	52 to 65	66 to 99
Grade 8	1 to 40	41 to 50	51 to 99
Grade 10	1 to 40	41 to 50	51 to 99

If you do not receive any reports, this is either because your school did not meet DESE's minimum reporting requirements or your school did not participate in the 2018 survey administration.

If your school or district did not receive data for a survey item or index, it is because fewer than 10 students participated, and/or all students within the school/district responded with the same answer, and/or the index scores did not meet DESE's minimum requirement for reliability. **Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017.** The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.

We have also embedded three supplemental materials that will help you and your schools understand and interpret what is in the reports. These supplemental materials are:

- An annotated sample report describing the layout and data elements within each report
- School climate profiles for each grade that are based on students' perceptions, to help you interpret the meaning of your overall school climate index score, and

- A two-page summary of school climate survey project and state-level results.

Two other supplemental materials are provided separately in your drop box to support the use of the school climate data. An **interpretive guide and action planning resource** for your district and school reports. These provide information on:

- The types of data within your report and what kinds of analyses you can do with each type
- How to analyze and interpret your data using the annotated sample report data as an example
- An action planning template, and
- Resources available for next steps once you have reviewed your data.

A **searchable crosswalk** highlights the connection between DESE's VOCAL school climate survey items and three other facets of building safe and supportive schools. In the crosswalk, each VOCAL item is mapped on to:

- CASEL's five social and emotional competencies (self-awareness, self-management, social awareness, relationship skills, and responsible decision-making),
- The principles of accessible instruction, and to
- The principles of positive behavior supports

DESE encourages schools to work together and use this student survey data in combination with other available local sources of data from students and parents, staff, and administrators to consider ways to maintain and increase areas of strength and to address any areas of concern. DESE also aims to learn from and help further these local efforts through our strategic priority to support social-emotional learning, health, and safety in schools across the Commonwealth.

If you have any questions about your school climate data, please email Shelagh Peoples (speoples@doe.mass.edu) of the Office of Planning Research.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Carrie', followed by a long, sweeping horizontal stroke that ends in a small upward flick.

Chief Strategy and Research Officer

Grade 5 VOCAL Profile: Statewide, scores range from 33 to 78

Schools with relatively weak school climates (bottom 15% of schools)	Schools with typical school climates (middle 70% of schools)	Schools with relatively strong school climates (top 15% of schools)
1  51	52  65	66  99
<p>1. Student-on-student relationships are largely respectful and caring but students are less open to having inclusive relationships with a diverse range of students. Adults model caring and respectful interactions.</p> <p>2. Teacher expectations for student effort and perseverance are less demanding. Teachers' help students succeed academically. Some students may benefit from more adaptive explanations to understand and access content. Teachers use student ideas, interests, and sharing to help students learn. The classroom environment is collaborative and supportive among students, and between students and teachers. Most students view their school work as appropriately challenging but tend not to want to or are unable to learn more when home.</p> <p>3. Students feel fairly safe in school. Bullying behaviors are present. Teachers/adults try to counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. Not all students feel school rules are fair for all students. Students have limited say in deciding these rules.</p> <p>4. Students, overall, feel happy in school but have a more moderate sense of belonging to their school. Schools teach students how to develop caring relationships and how to manage their emotions when angry or upset. Teachers reach out to help distressed students with most students feeling comfortable seeking help. Students can also largely rely on their peers for emotional support.</p>	<p>1. Student-on-student relationships are largely respectful and caring with students open to having inclusive relationships with a diverse range of students. Adults actively model caring and respectful interactions.</p> <p>2. Teachers have high expectations for student effort and perseverance. Teachers help students succeed academically by using different strategies to explain and make content accessible. Teachers use student ideas, interests, and sharing to help students learn. The classroom environment is collaborative and supportive among students, and between students and teachers. Most students view their school work as appropriately challenging and enjoy learning more when home.</p> <p>3. Students feel safe in school. Bullying behaviors are present but teachers/adults actively counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. Not all students feel school rules are fair for all students. Students have limited say in deciding these rules.</p> <p>4. Students, overall, feel happy in school but have a more moderate sense of belonging to their school. Schools teach students how to develop caring relationships and how to manage their emotions when angry or upset. Teachers reach out to help distressed students with most students feeling comfortable seeking help. Students can also largely rely on their peers for emotional support.</p>	<p>1. Student-on-student relationships are largely respectful and caring with students open to having inclusive relationships with a diverse range of students. Adults actively model caring and respectful interactions.</p> <p>2. Teachers have high expectations for student effort and perseverance. Teachers help students succeed academically by using different strategies to explain and make content accessible. Teachers use student ideas, interests, and sharing to help students learn. The classroom environment is very collaborative and supportive among students, and between students and teachers. Most students view their school work as appropriately challenging and enjoy learning more when home.</p> <p>3. Students feel very safe in school. Some bullying behaviors are present but teachers/adults actively counteract these behaviors. Students also try to prevent bullying. When students are in trouble, most students are given a chance to explain their behavior. A large majority of students feel school rules are fair for all students. Students have a say in deciding these rules.</p> <p>4. Students, overall, feel very happy in school and have a strong sense of belonging to their school. Schools actively teach students how to develop caring relationships and how to manage their emotions when angry or upset. Similarly, teachers actively reach out to help distressed students. As a result, students feel comfortable seeking help. Students can also largely rely on their peers for emotional support.</p>
The average student within these schools responds “mostly true” to a large majority of items, and “always true” and “mostly untrue” to three and two items, respectively	The average student within these schools responds “mostly true” to a majority of items, “always true” to all but one of the remaining items, and “mostly untrue” to one item	The average student within these schools responds “always true” to a majority of items, and “mostly true” to all remaining items.

• Descriptors bolded highlight the salient differences between the perceptions of the average student within the three categories of schools (weak, typical, and strong).

Grade 5

Suppression note: "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Suppression note: Blank or "--" means data are suppressed if fewer than 10 students responded or the reliability is from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across time.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

DESE categorized schools into three groups based on their overall school climate index score. All index scores range from 1 to 99. The range of points for each score category is provided.

Average Index Score by Dimension

This section of the report allows you to directly compare your school's average index scores (overall school climate, engagement, safety, and environment) to your district's and to the state's average scores. A difference of 3 to 4 points or more is meaningful.

Engagement Topics	Safety Topics	Environment Topics
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

This section provides a description of what the VOCAL survey is measuring for each topic and dimension.

Background

- The Views of Climate and Learning (VOCAL) survey is designed to provide schools with information on student perceptions of three dimensions of school climate: engagement, safety, and environment. The topics measured within each dimension are summarized below.

Engagement	Safety	Environment
<ul style="list-style-type: none"> The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes. 	<ul style="list-style-type: none"> The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students 	<ul style="list-style-type: none"> The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
<ul style="list-style-type: none"> The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers. 	<ul style="list-style-type: none"> The extent that students feel physically safe within the school environment. 	<ul style="list-style-type: none"> The extent that students have access to systems support that effectively support their social, emotional and mental health well-being
<ul style="list-style-type: none"> The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life. 	<ul style="list-style-type: none"> The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying. 	<ul style="list-style-type: none"> The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

- The survey is based on the conceptual framework of the U.S. Department of Education's School Climate Surveys.
- The VOCAL survey helps the state to meet requirements included in the Act Relative to Bullying in Schools.

Survey design, responses, scales, and reporting

- Students in grades 5, 8, and 10 were given the option to participate in the survey as part of the state MCAS administration in 2018. The survey was optional for districts, schools, and individual students.
- DESE administered 76 items across the three grades with common items across the surveys to allow for later data linking. All items used the same response options: always true, mostly true, mostly untrue, and never true.
- Statewide, 79 percent of eligible students participated in the survey: 84% in grade 5, 89% in grade 8, and 64% in grade 10. Large majorities of schools (94%) and districts (97%) had at least one student respond. Responding students were demographically similar to non-responding students.
- In addition to reporting individual item responses, DESE developed an overall school climate index score and index scores for the three dimensions of climate (engagement, safety, and environment). These indices were set to a mean of 50 and a standard deviation of 20; differences on the indices of about 3 to 4 points or more represent a meaningful difference in school climate.
- All indices in 2018 are directly comparable to one another and across grade levels. For the first time, districts will also receive a bullying index score that can be compared to other scores. Schools and districts that participated in the 2017 pilot should not compare index scores from 2018 to 2017. The 2018 scores are not anchored on the same scale. The 2018 index scores will form a baseline for future trend data.
- To preserve respondent confidentiality, DESE suppressed data if fewer than 10 students responded, if all students responded identically on an item, or if the reliability of the responses was at least 0.7 on a scale from 0 to 1. After accounting for these criteria, 88% of schools and 94% of districts received a report.

Findings

- Students generally reported that they experienced positive school climates.
 - In schools with typical school climates, the average student within the school responded "mostly true" to a majority of items and "always true" to a majority of the remaining items
 - Across all three grades, 7 in 10 students responded in the two most positive categories on over 60% of the items within each survey.

VOCAL 2018 Summary

October 2018

- Students in grade 5 reported more positive school climates than students in grade 8 or grade 10 across all three dimensions of school climate.

	Student-level average index score		
	Grade 5	Grade 8	Grade 10
Overall school climate	58	46	45
Engagement	56	46	46
Safety	58	46	45
Bullying	57	46	45
Environment	56	46	46

o In schools with typical school climates, the average fifth grade student responded “always true” to a 33% of the survey’s items. In comparison, the average grade 8 and grade 10 student within schools with typical school climates responded “always true” to only 16% and 10% of the surveys’ items, respectively. For example, 22% of grade 5 students responded “always true” to the statement, “My teachers use my ideas to help my classmates learn.” In comparison, 8% and 12% of grade 8 and grade 10 students responded similarly to this item.

- Among schools that had sufficient responses to receive reports, the overall school climate index ranged from 27 to 78, showing considerable variation in climate across schools. Substantial variation was also evident among schools for each of the three dimensions of school climate: engagement (scores ranged from 35 to 75), safety (23 to 74), and environment (30 to 73).
- Across the three grades, students in schools with the strongest climates (the top 15% percent of schools) reported many more positive aspects of their school environments when compared to students in the weakest climates (the bottom 15% of schools).

o In grade 5, students in the strongest schools are more open to having inclusive relationships with a diverse range of students and the classroom environment is more collaborative. Teachers have higher expectations for student effort, perseverance, and academics. Students feel safer in the strongest schools with fewer bullying occurrences. They believe their school rules are fair for all students, not just some. Adults are also more active in helping students emotionally and teaching positive behavior.

o In grade 8, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student effort and academics, and use student ideas and interests to plan and guide instruction. Teachers are more readily available when students need help. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

o In grade 10, student-on-student relations in the strongest schools are more respectful and open. Teachers have higher expectations for student academics and provide more opportunities for students to challenge themselves. They are more readily available when students need help. Teachers use student ideas, feedback and interests to guide instruction. Students feel safer and can rely more on adults and to a lesser extent students to counteract any bullying. Adults actively promote and model respectful relationships and students can rely to a greater extent on teachers and their peers for emotional and behavioral support. Teachers are more willing to listen to students when they are in trouble.

North Public School District: North Middle School
Grade 8

Suppression note: Blank or "--" means data item are suppressed if fewer than 10 students responded or the reliability is less than 0.7. Reliability is a statistical measure that ranges from 0 (not at all reliable) to 1 (reliable). Measures with high reliability are accurate, reproducible, and consistent across multiple rounds of surveys on the same population.

Rounding: Percent "always true" and "mostly true" may not sum to total because of rounding.

Average Index Score by Dimension

Dimensions and topics measured by VOCAL

Engagement	Safety	Environment
Cultural Competence The extent students feel the adults/students value diversity, manage dynamics of differences, and avoid stereotypes.	Emotional Safety The extent students feel a bond to the school, and the extent adults/students support the emotional needs of students.	Instructional Environment The extent that students feel the instructional environment is collaborative, relevant, challenging and supportive of learning.
Relationships The extent students feel there is a social connection and respect between staff/teachers and students, and between students and their peers.	Physical Safety The extent that students feel physically safe within the school environment.	Mental Health Environment The extent that students have access to systems support that effectively support their social, emotional and mental health well-being.
Participation The extent students feel engaged intellectually, emotionally, and behaviorally in the classroom, and the extent that students or their parents are engaged in school life.	Bullying/Cyber-bullying The extent that students report different types of bullying behaviors occurring in the school and the extent that school/staff/students try to counteract bullying.	Discipline Environment The extent that discipline is fair, applied consistently and evenly, and a shared responsibility.

Report to School Committee: Safety & Security Update

Date: April 4, 2019

We continue to review and update Safety & Security Procedures, methods and systems at all 4 School Buildings.

We are upgrading our card access system so that all four buildings will not be on the same system. This makes for better, tighter security, control of access cards, and monitoring of the buildings. This upgrade work will begin over April vacation.

ALICE Drills and Training.

Shaker Lane and Russell Street have recently completed ALICE Training drills with staff and students. April 2 and March 27

Middle School: ALICE Drills Scheduled for April 30

High School ALICE Drills are scheduled for the spring - April 30

High School will conduct AED and CPR Training for High School Seniors in April
Staff was trained in Dec 2018

Additional Security cameras are being installed at the High School, both internal and external to cover some areas as requested by school admin staff, and our resource Officer.

Additional camera to be installed at the Russell Street school to provide additional coverage of the playground areas.

We are reviewing cell phone and hand held radio reception enhancement equipment to help increase coverage for internal and external communications at all schools.
