

Our Tiling Pattern Project

1. You will make a design using polygon shapes. You will include at least three different types of polygons in your design. You can choose to include squares, triangles, rectangles, rhombuses, parallelograms, trapezoids, pentagons, hexagons, etc.
2. You will color your design so it is as beautiful as you can make it. You can use crayons, markers, colored pencils, or colored paper to put color in your design.
3. You can make your design any shape you want to make it, but I will give higher grades if the shape of your design is a regular polygon. A regular polygon is, of course, a polygon whose sides are all equal length like a square:

or a hexagon:

BE CREATIVE AND HAVE FUN!

Here are examples to get you started:
